Vision 2020 *presented remotely via live webinar by*

Dr. Tracey Parnell and IRRM Board of Directors

Assistant Clinical Professor, University of British Columbia, Canada. Masters in Reproductive Medicine, University of New South Wales, Australia.

Director of Communications and Development, International Institute for Restorative Reproductive Medicine.

The Mission of the International Institute for Restorative Reproductive Medicine is to advance excellence in Restorative Reproductive Medicine by supporting practice and research through mentorship, education and collaboration.

A growing network of professionals

Restorative Reproductive Medicine encompasses medical approaches which aim to identify and address underlying reproductive disorders and correct or optimize function. Health care providers who practice Restorative Reproductive Medicine employ a variety of approaches but use only methods that do not destroy, bypass or suppress the reproductive system and they adhere strictly to these philosophical principles.

The IIRRM is the leading voice in uniting providers who share a common belief that patients deserve evidence-based reproductive health care services that cooperate with and restore reproductive function. With the successful roll out of our international conference and webinar agenda we now can actively reach and support providers across the world. With our educational series and active support of research in the field we are able to provide our members with unparalleled opportunities to be part of transforming reproductive medicine.

JOIN TODAY and share your experience while learning about the latest advances in the field of Restorative Reproductive Medicine. As a member, you take an active role in shaping the future in which Restorative Reproductive Medicine, backed by published evidence and years of experience, becomes the standard of care.
